

PRM rating × human-calibrated contribution type

Cramer's V=0.528; expected-diagonal share=65.5% (full cohort: N=600 steps)

	Essential	Redundant	Harmful
rating -1	25 4.2% of all steps	15 2.5% of all steps	160 26.7% of all steps
rating 0	55 9.2% of all steps	115 19.2% of all steps	30 5.0% of all steps
rating 1	118 19.7% of all steps	69 11.5% of all steps	13 2.2% of all steps

Outlined cells form the expected rating–contribution diagonal; 34.5% are off-diagonal.
